Call for Papers

1st Workshop on Continuous Software Engineering (CSE)

In conjunction with Software Engineering 2016

Vienna, February 23, 2016

IMPORTANT DATES
Submission deadline: December 13, 2015
Notification of acceptance: January 12, 2016
Camera-ready version: January 23, 2016
Workshop date: February 23, 2016

ORGANIZERS
Bernd Brügge,
Lukas Alperowitz, TU München
Horst Lichter,
Andreas Steffens RWTH Aachen
Dirk Riehle, FAU Nürnberg

PROGRAM COMMITTEE
Bernd Brügge
TU München
Willi Hasselbring
Universität Kiel
Martin Jung
develop group, Erlangen
Stephan Krusche
TU München
Horst Lichter
RWTH Aachen University
Christian Nester
Google Inc.
Dirk Riehle
FAU Nürnberg
Heinz-Josef Schlebusch
Kisters AG, Aachen
Christian Uhl
codecentric AG, Düsseldorf
Stefan Wagner
Universität Stuttgart
Heinz Züllighoven
WPS und Universität Hamburg

In order to develop and deliver high-quality products to their customers, software companies have to adopt state-of-the-art software development processes. To face this challenge, companies are applying innovative methods, approaches and techniques like agile methods, DevOps, Continuous Delivery, test automation, infrastructure as code or container-based virtualization.

These new approaches have a high impact on the specification, design, development, maintenance, operation and the evolution of software systems. Therefore, common software engineering activities, organizational forms and processes have to be questioned, adapted and extended to ensure continuous and unobstructed software development (Continuous Software Engineering). So far, there is a lack of systematic approaches to face these challenges.

The goal of this workshop is to present and discuss innovative solutions, ideas and experiences in the area of Continuous Software Engineering (CSE).

TOPICS OF INTEREST
The topics of interest include, but are not restricted to the following:

- DevOps & Release Engineering
- Approaches to Continuous Integration/Delivery/Deployment
- Infrastructure as Code
- Test Automation & Optimization
- Monitoring & Performance
- Security for DevOps
- Provisioning of Software & Infrastructure
- Application Virtualization with Container Engineering of Deployment Pipelines
- Quality & Metrics for DevOps
- Design for Scalability
- Organizational issues for CSE
- Continuous Delivery for Requirements Engineering/Early Prototyping
- Change Management - Handling user feedback
- Teaching CSE approaches
- Software CSE approaches
- Microservices
- Software Development Lifecycle for CSE

SUBMISSIONS
We solicit two types of submissions: full papers (up to 8 pages) and short papers (up to 4 pages). Full papers present original and evaluated research whereas short papers describe novel ideas, identified challenges, and especially experience reports related to the workshop's theme. We encourage you to submit a contribution, both from a research and an industry perspective. All submissions will be peer reviewed and judged on the basis of their clarity, relevance, and interest to the workshop participants.

Paper submissions must be in English and conform to the LNI format.

Papers are to be submitted electronically to the CSE2016 EasyChair paper submission system.

The workshop proceedings will be published at CEUR-WS, which is indexed by dblp, the world's most comprehensive open bibliographic data service in computer science.

Authors of accepted papers have to register for the workshop.
